

Bellows Collection. Design: Toan Nguyen.

The leather is gathered in soft, sturdy folds. And then it stretches. Bellows changes its height. In an uncomplicated way with just a single movement. The ring-shaped trigger for adjusting the height is concealed in the seat. The collection particularly likes to show its expressive character as a twosome, in a group or as an addition to a sofa.

STOOL

Model no.	222-H
Frame	Wooden construction with an internal spring.
Cover	Gathered leather.
Seat top	Upholstered, leather-covered.
Glides	Fitted with felt glides for stone and wooden floors or synthetic glides for carpet floors.

TABLE

Model no.	222-H
Frame	Wooden construction with an internal spring.
Cover	Gathered leather.
Table top	Metal, in textured painted black with a soft finish.
Glides	Fitted with felt glides for stone and wooden floors or synthetic glides for carpet floors.

MECHANISM

The height adjustment is induced by a ring-shaped trigger within stool or table.
