

Circle. Design: UN Studio/Ben van Berkel.

The connection of convex and concave shapes results in sweeping sculptures. The slope of the back and the seating area make up an unbroken flow from sitting upright to lying in relaxation. The height is the only thing that remains constant. Six individual elements combine to build numerous variations.

Designawards

Model no.

900

Frame

Steel construction.

Upholstery

Cold cure foam sandwich construction

Bolster

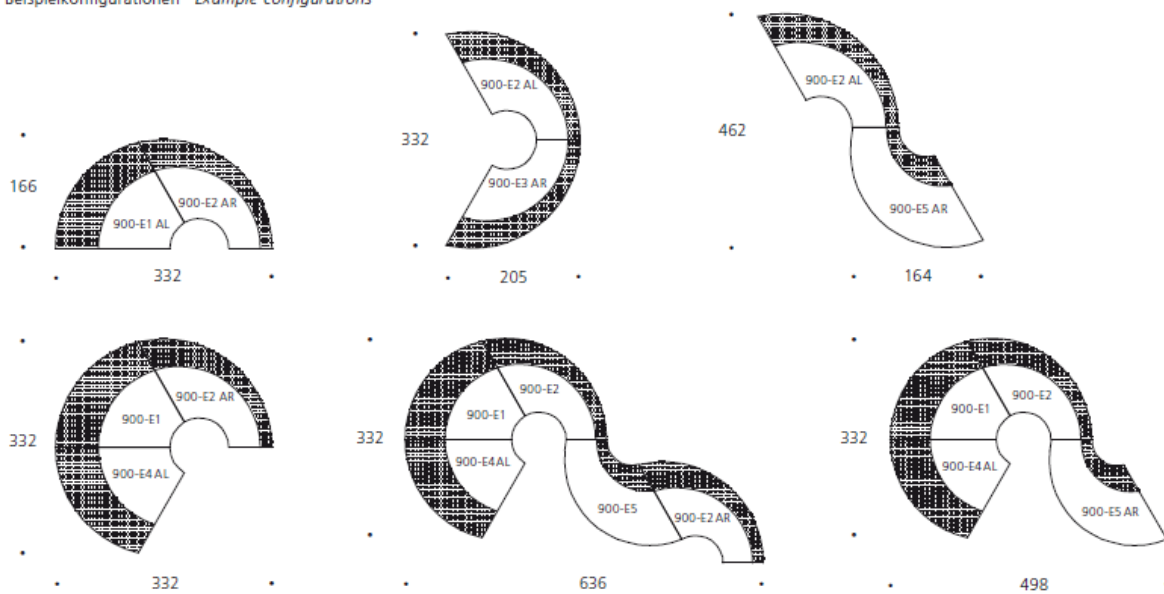

Cold cure foam with an outer layer of wadding.

Loose cushion

With fibre/down filling.
