eye
designed by Jackie Choi

Eye is designed for those who recognise the virtue of making a strong visual statement to reflect the dynamic and innovative character of their workspace.

Eye is itself a testimony to innovation. It is the result of designer Jackie Choi's creative imagination, combined with the talent of people skilled in their craft and the application of modern technology.

While Eye is a striking design, it makes no compromises on ergonomic comfort. To achieve this balance we used a complex construction process combining cold cure foam with an internal steel cage. Upholstering the Eye was only possible because of the tried and tested skill of our craftspeople.
